1. Location: Just west of the winter harbor. The Danube River bridge is immediately southwest of the refinery.
2. War damages: It was partially destroyed by bombs in 1944.
3. Plant installations: Two large administration buildings. Several workshops. Three cisterns, and eleven electric cranes for loading and unloading.
4. Capacity: Only part of the refinery is in operation.
5. Shipments: By rail from the transshipment tank station in the harbor.

Comment:

a. The oil refinery in PRESSBURG (BRATISLAVA), a subsidiary plant of the National Enterprise "Slovakian Mineral Oil Refinery" had a daily production capacity of 1,800 barrels of crude oil and a cracking capacity of 1,100 barrels. The plant, which was heavily damaged during the war, is still under construction. It will be enlarged to such an extent that its annual capacity will be increased from 80,000 tons to 120,000 tons.

b. Annex 1 is a location sketch of the various mineral oil installations in BRATISLAVA. Annex 2 shows the approximate layout of these installations.

2 Annexes: 1. BRATISLAVA (PRESSBURG) Oil Refinery.

2. BRATISLAVA (PRESSBURG) Oil Refinery.
